

Low Impact Development design manuals acceptable to Madison County

The Madison County Water Protection Ordinance was adopted to establish requirements for the management and control of Stormwater runoff from developed properties in the County during and after their construction. This list contains guidance for designers to assist them in meeting those requirements.

- [Virginia Stormwater Management Handbook, Volumes I and II, prepared by the Virginia Department of Conservation and Recreation dated 1999, as amended.](#)
- [Virginia Erosion and Sediment Control Handbook, prepared by the Virginia Department of Conservation and Recreation dated 1992, as amended.](#)
- [Low Impact Development Design Strategies: An Integrated Design Approach, United States Environmental Protection Agency, Office of Water, EPA 841-B-00-003 dated June 1999, as amended.](#)
- [Virginia Department of Transportation \(VDOT\) Drainage Manual, prepared by the Hydraulics Section of the Virginia Department of Transportation dated 2002, as amended.](#)
- [Prince Georges County Bioretention Manual, prepared for Prince Georges County, Maryland, November 2001, Revised December 2007, Prince Georges County, Maryland.](#)
- [Northern Virginia BMP Handbook prepared by the Northern Virginia Regional Commission, dated 1996, as amended.](#)
- [Culpeper County Stormwater Design Manual prepared by Culpeper County, Virginia dated June 2008, as amended.](#)

These manuals should be used by designers to ensure that standard, acceptable design practices are used in developing their Stormwater management designs. Other design manuals may be considered for guidance. A letter requesting the use of additional design manuals should be submitted to the county prior to any use of such designs.
